

Listing of Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (currently amended))

Device for assembling, tuning and testing motor vehicles, ~~characterized in that~~ wherein the device may be assembled from individual, transportable, modular, interconnectable components that can be installed on a flat surface without using pits or creating floor load, said device encompassing the conveying mechanisms and assembly units for the motor vehicles to be assembled.

2. (currently amended)

Device according to claim 1, ~~characterized in that~~ wherein coupling means are provided for supply lines running in the individual components.

3. (currently amended)

Device according to claim 1, ~~characterized in that~~ wherein the conveying mechanism is a mechanism for overhead conveyance of the motor vehicles.

4. (currently amended)

Device according to claim 1 ~~or claim 2, characterized in that~~

wherein the device encompasses a final assembly section.

5. (currently amended)

Device according to claim 3, ~~characterized in that~~ wherein the device includes a vehicle test rig in which the motor vehicle is suspended; the vehicle wheels may be set in rotation or braked by motor-driven elements of a roller, braking and ABS test rig, said elements acting upon the wheels from the side.

6. (currently amended)

Device according to claim 5, ~~characterized in that~~ wherein the motor-driven elements act on the tires.

7. (currently amended)

Device according to claim 5, ~~characterized in that~~ wherein the motor-driven elements act on the wheel rims.

8. (currently amended)

Device according to claim 5, ~~characterized in that~~ wherein the motor-driven elements act on the wheel hubs.

9. (currently amended)

Device according to claim 4, ~~characterized in that~~ wherein means are provided for automatically performing acceleration and braking operations.

10. (currently amended)

Device according to claim 4, ~~characterized in that~~ wherein means are provided for automatically performing additional

function tests.

11. (currently amended)

Device according to claim 1, ~~characterized in that~~ wherein means are provided for the overhead conveyance of the finished motor vehicles out of the assembly hall.

12. (currently amended)

Device according to claim 10, ~~characterized in that~~ wherein a branch to a rework station is provided.

13. (currently amended)

Individual, transportable, modular components for assembling a device according to ~~the claims 1 to 11~~ claim 1.
